

Welcome to the Jabatix online documentation!

What Jabatix offers

A scalable, secure cloud-native technology, thus providing you with a future-proof architecture fully focused on the topics of financial operation throughout their entire life cycle and across any distribution channels.

This future-proof technology supports you in your development operations – and enables you to stay ahead of your competition

The focus is on quick and easy configuration and integration rather than tedious implementation efforts. Benefit from all the advantages cloud computing provides in comparison to traditional on-site deployment. Business agility and continuous improvements are guaranteed and can quickly be implemented if and when required.

Dynamic Software

The clear focus lies on ease of use and speed: Fully documented self-service environment with simple API. Your software development has never been faster than with Jabatix.

Jabatix is a component-based solution that covers the entire process chain of lending operations including *Loan Origination*, *Life Cycle Management*, *Account Processing*, *Financial Accounting*, *Bank Capital Management*, *Regulatory Reporting* and *Business Optimisation*.
